

Wickham Roofing LLC

3074 Ellen St., Ochlocknee, GA, 31773

SUPPLEMENT REQUEST

Job ID: TEST-100

Summary of Mathematical Variances:

Category	EV Value	SoL Value	Variance
Area Shortage	78.06	23.67	54.39
Ridge/Hip Cap Shortage	435.0	60.0	375.0
Missing O&P	N/A	N/A	N/A

Contractor Notes & Code Requirements:

Dear Adjuster,

This letter serves as a formal supplement justification for job ID TEST-100, where Wickham Roofing LLC has identified significant and unacceptable discrepancies between your Statement of Loss and the actual scope of work required, as validated by our EagleView measurement report. Your current scope is grossly inadequate and fails to account for the full and complete replacement of the damaged roofing system.

Let's be unequivocally clear on the mathematical shortages that must be rectified:

- Roofing Squares:** Your Statement of Loss allows for a mere **23.67 squares** of roofing. This is a severe and indefensible underestimation. Our EagleView report, a standard and reliable industry measurement tool, clearly shows a normalized total of **78.06 squares**. This represents an unacceptable shortage of **54.39 squares**. We require payment for the full 78.06 squares to properly restore the roof to its pre-loss condition.
- Ridge/Hip Cap:** Your scope includes only **60.0 LF** for ridge and hip cap. The EagleView report accurately measures **435.0 LF** of ridges and hips. This constitutes a critical shortage of **375.0 LF**. Proper installation of ridge and hip cap is absolutely essential for the integrity, weatherproofing, and longevity of the roof system, and we will not compromise on this necessary component.
- Overhead and Profit (O&P):** Your Statement of Loss completely omits Overhead and Profit. This project involves multiple trades and the general contractor oversight necessary to manage the full scope of repairs, including but not limited to, the roofing system itself. The omission of O&P is unacceptable and does not reflect the standard and necessary costs associated with managing a comprehensive restoration project of this nature.

These are not minor oversights; they represent a fundamental failure to accurately assess the damage and the required repairs. Wickham Roofing LLC is committed to restoring properties to pre-loss condition, which necessitates a complete and accurate scope of work. We expect these discrepancies to be rectified immediately.

We demand an updated Statement of Loss that accurately reflects the full scope of work, including the correct square footage, linear footage for ridge/hip cap, and the appropriate allocation for Overhead and Profit. Failure to provide a comprehensive and accurate scope will result in further delays and

potential disputes.

Sincerely,

Wickham Roofing LLC

Scope of Work: This estimate covers explicitly listed materials and applications. Any hidden structural rot, decking damage, or code upgrades discovered during tear-off will be handled via a supplemental change order.

Payment Terms: All balances are due upon job completion. Unpaid invoices past 30 days are subject to standard financing interest rates as specified by corporate policy.
